

PRODUCT DATA SHEET

Beaded Chain

Use: Adjustable links that can be opened and closed allows varying chain lengths for particular uses.

Brass Beaded Chain

Description: Polished, durable Brass beaded chain will not rust or corrode.

Melting Point: 1680°F

Specifications: 4-1/2" lengths of flexible beaded chain

Ball Diameter: 1/8"

Avg. Tensile Strength: 30 lbs.

Nickel Beaded Chain

Description: Nickel plate over solid steel material will not rust or corrode.

Melting Point: 1680°F

Specifications: 4-1/2" lengths of flexible beaded chain

Ball Diameter: 1/8"

Avg. Tensile Strength: 30 lbs.

Aluminum Beaded Chain

Description: Flexible beaded chain is lightweight and corrosion resistant

Melting Point: 1250°F

Specifications: 4-1/2" lengths of flexible beaded chain

Ball Diameter: 1/8"

Avg. Tensile Strength: 16 lbs.

Stainless Steel Beaded Chain

Description: Grade 304 of stainless steel is great for rough environments that need corrosion resistance and strength.

Melting Point: 2550°F

Specifications: 4-1/2" lengths of flexible beaded chain

Ball Diameter: 1/8"

Avg. Tensile Strength: 45 lbs.
