

## Save Time and Money with FREE Contractor Services

We're dedicated to simplifying your process. In the interest of saving you both time and money, our OSHA-authorized contractor specialists provide three FREE contractor services meant to keep your projects on time and on budget. Let our safety experts help you choose the right products for every job. Questions? Give our contractor specialists a call today at 877-367-7732 or visit [seton.com/contractorservices](https://seton.com/contractorservices).

### Project Take-Offs\*

Let us provide you with color-coded drawings and a bill of material listing all the products you'll need to meet ANSI/ASME A13.1-2015 pipe and valve marking requirements. That way, you can focus on completing your project as efficiently as possible. After you provide your engineer's blueprints and specifications, we can put together a project take-off service, that includes:

- List of products you need
- A detailed take-off image
- A bill of materials (includes pipe marker legends with size, color, location and quantity needed)

\*Project Take-Off Service is free only if customer places order with Seton.

### Project Packaging

Our project packaging simplifies the receiving and installation process for identification markers with next-level technology. We can package your order any way you'd like, based on what you determine will simplify the installation process:

- Standard program - Let us know how you want your order sorted and we will label and pack it by floor, room or building, eliminating the need for pre-sorting
- Enhanced program - Each box ships with a specific QR code that gives you access to the content packaging list and take-off drawing for that specific box. Only available with take-off services
- For a demo to see how this service will save you time and money call 877-367-7732

### Submittal Packages

Construction jobs — both large and small — contain plenty of details. Simply submit the specifications of the job and we will produce a submittal package based on needs you've identified. Our pipe and valve marking submittals include:

- Access to a full library of submittals for pipe markers, valve tags and equipment plates
- An OSHA-authorized contractor team
- A submittal package
