

GHS Compliance Checklist

June 1, 2016 is the deadline for all employers to be in compliance.

- 
- Get your training policy in place (including new and existing chemical and internal product changes). Don't forget to include a re-training component to ensure your employees remember the key elements to achieving GHS compliance.
 - Update and complete a written Hazcom program that includes:
 - a system of labeling
 - pictograms
 - a training schedule
 - where/how to obtain more information
 - Perform audits whenever new chemical hazards are introduced to the workplace, and routinely reevaluate your Hazcom program to ensure continued success, effectiveness and safety.
