

We do the work for you!

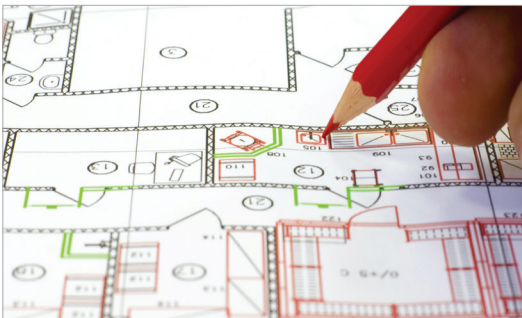

For over 60 years, Seton has been written into construction specifications as the premium supplier to architects, engineers, and other specifiers. We ensure all pipe and valve marking on your job meets ANSI/ASME A13.1-2015 with our **FREE*** Take-Off Services.

*Project Take-Off Service is free only if customer places order with Seton.

You provide us your engineer's blueprints and specifications.

We analyze the prints and review what products you will need from us to meet compliance regulations.

We provide you with a detailed take-off image.

Your image includes easy color-coded drawings that outline the quantity, location and content of pipes and valves on your jobsite and simplifies your installation.

We draft up your bill of material.

You'll receive an outlined spreadsheet that lists all the proper pipe markers and valve tags you will need for your project.

About Seton

For more than 60 years, Seton has been the most trusted source of pipe markers for architects, engineers, contractors and specifiers. In fact, we've been written into more project specs than any other company! Our OSHA-authorized contractor specialists are available to help with all your project needs. Between their hands-on experience in the field and unparalleled expertise, they will help ensure your jobsites are safe, compliant and on budget. We proudly carry a wide variety of pipe marking products that are fully compliant with current ANSI standards as well as customizable products to meet the specific needs of your projects. See for yourself why Seton is the industry leader in pipe marking.
